

## Ordering information

### Instruments

|                                    |      |
|------------------------------------|------|
| • CAPILLARYS 3 OCTA .....          | 1245 |
| • CAPILLARYS 3 TERA .....          | 1246 |
| • CAPILLARYS 3 TERA TLA .....      | 1248 |
| • CAPILLARYS 3 TERA Loader .....   | 1249 |
| • CAPILLARYS 3 TERA Conveyor ..... | 1250 |
| • MINICAP FLEX-PIERCING .....      | 1232 |

### Controls/Calibrators

|                                                                 |      |
|-----------------------------------------------------------------|------|
| • Hb A1c CAPILLARY Calibrators<br>(2 levels) .....              | 4755 |
| • Hb A1c CAPILLARY Calibrators<br>(5x2 levels) .....            | 4756 |
| • Multi-System Hb A1c CAPILLARY<br>Controls (10x2 levels) ..... | 4767 |
| • Multi-System Hb A1c CAPILLARY<br>Controls (2 levels) .....    | 4768 |

### Accessories

|                                                    |      |
|----------------------------------------------------|------|
| • CAPILLARYS 3 & MC switch rack<br>For HbA1c ..... | 1383 |
|----------------------------------------------------|------|

### Reagents

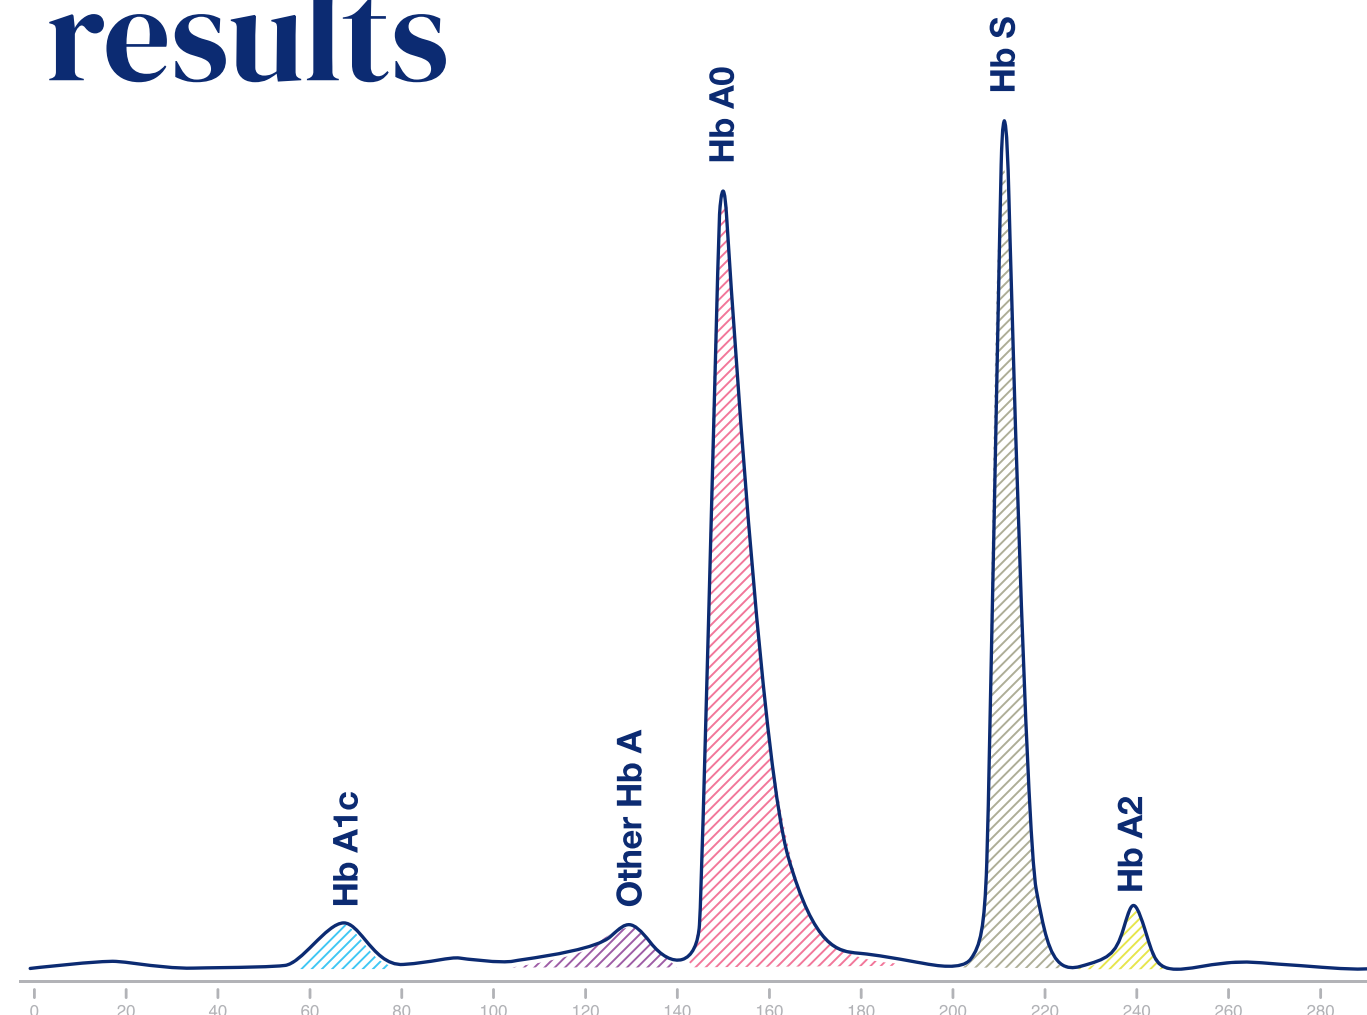

|                        |      |
|------------------------|------|
| • CAPI 3 Hb A1c .....  | 2515 |
| • MINICAP Hb A1c ..... | 2215 |

### Consumables

|                                                            |      |
|------------------------------------------------------------|------|
| • CAPILLARYS 3<br>CAPICLEAN .....                          | 2060 |
| • CAPILLARYS 3<br>Wash Solution .....                      | 2062 |
| • CAPILLARYS 3<br>Bins for used Reagent Cups .....         | 2581 |
| • CAPILLARYS 3<br>Reagent Cups (24x14 units) .....         | 2582 |
| • MINICAP FLEX-PIERCING<br>CAPICLEAN .....                 | 2251 |
| • AUTOMATIC LOW VOLUME<br>Bar code labels (20 units) ..... | 9208 |
| • MANUAL LOW VOLUME<br>Bar code labels (20 units) .....    | 9209 |
| • A1c/CE - CAPILLARY BLOOD*<br>Sample kit .....            | 9212 |
| • Test Tubes .....                                         | 9214 |
| • A1c/CE LOW VOLUME SAMPLE<br>Collection tube .....        | 9216 |

## HbA1c by capillary electrophoresis: *clear-cut and precise results*

### Ergonomics

The laboratory optimisation consultancy service provides effective solutions that fit your needs: increased productivity, TAT management, hands-on time improvement, consolidation and optimised workflow.

### Flexibility

The HbA1c test can be added to a wide range of diagnostic tests on the same platform. This provides flexibility to meet the needs of both: small and large laboratories.

### High resolution

The clear separation between HbA1c and the most common hemoglobin variants ensures results without analytical interference. Accurate HbA2 measurement contributes to better patient management.

### Productivity

The simultaneous analysis of multiple samples supports productivity, which can be adapted to any workload.

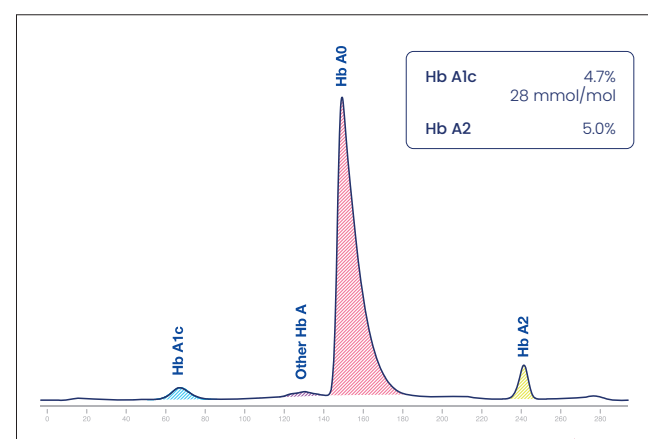

### Accuracy

Scientific publications and results of EQA programs reflect the excellent performances of the Sebia method, also IFCC and NGSP certified.

### Facilitated interpretation

Thanks to the clarity of the electrophoretic profiles, the time required for validation is reduced, even in the presence of hemoglobin variants or thalassemias, easily and clearly detected.

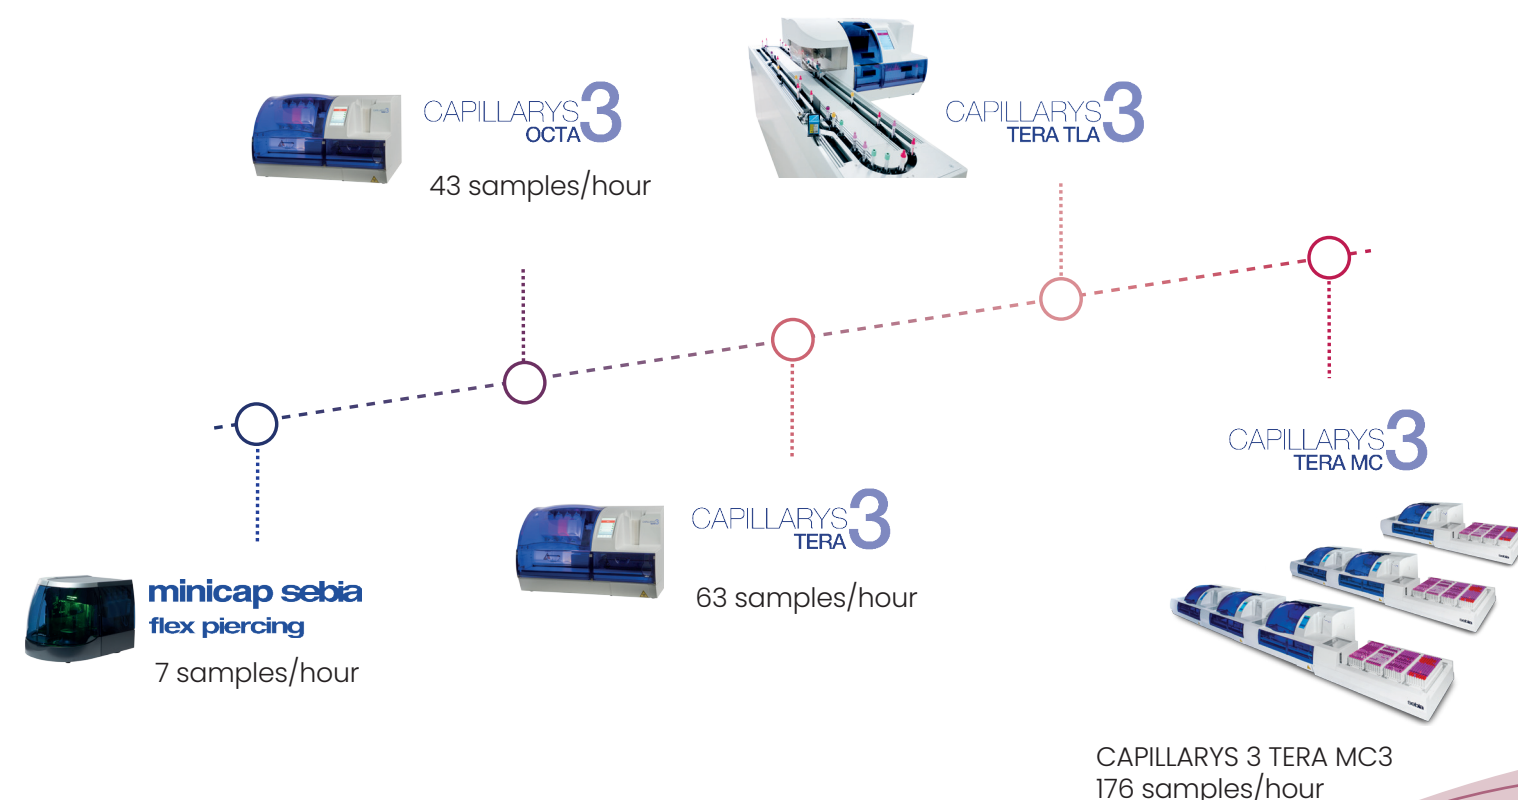

Pattern with  $\beta$ -Thalassemia

## Multiparametric instruments *with large range of tests\**

- HbA1c (venous blood)
- HbA1c (capillary blood)
- Serum & Urine Protein Electrophoresis (SPE & UPE)
- Serum & Urine Immunotyping
- CDT/CDT<sub>IFCC</sub>
- Hemoglobin Electrophoresis (adult whole blood)

## Scalable solution *adapted to each lab's activity*

Flexible automation and consolidation

Laboratory optimisation consultancy service

"Best in class" separative method
